

Dear Parent/Carer,

In school, we use DreamBox Maths, an online maths development programme that is enhancing maths teaching and learning.

About the DreamBox Maths Star of the Month (SOTM)

Daisy Education, the provider of DreamBox Maths, celebrates one student who has demonstrated outstanding commitment to DreamBox Maths – with noticeable impact in their engagement, confidence and understanding.

These students embody the spirit of resilience, problem-solving and an openness to explore in maths.

How does DreamBox Star of the Month award work?

Teachers nominate students who have shown exceptional commitment to DreamBox Maths. Each winner receives a special prize kit, including:

- A £15 voucher and a trophy.
- A winner's certificate and personalised letter.
- Maths merchandise and stickers.

As a school, we also receive a digital pack to share the news with our local community, and support from Daisy Education to highlight the student successes.

What is DreamBox Maths?

DreamBox Maths is designed to improve children's maths capabilities and confidence. DreamBox Maths is an online maths programme that enhances students' maths skills – improving their academic outcomes and preparing children for future success. Through regular practice on the programme, your child will receive personalised instruction to develop conceptual understanding, build critical skills and improve achievement.

How does DreamBox Maths work?

Whether pupils are mastering foundational skills, gaining deeper conceptual understanding, or advancing to more complex topics, DreamBox Maths supports them at every stage by providing personalised, adaptive maths lessons.

How can you support your child?

Your child can access DreamBox Maths via a browser on devices such as laptops, desktops, and Chromebooks or they can use the app on iPads. Assignments in each component can be completed in any order. The programme will keep track of assignments completed each week as well as your child's progress towards the overall lesson goals.

Encourage your child to do additional work in DreamBox Maths if they complete the weekly assignments.
